GOD THE SOURCE OF ALL INTELLIGENCE AND WISDOM—MAN A NATURAL AND SPIRITUAL BEING—MYSTERIOUS NATURE OF HIS SENSES AND FACULTIES—MEN TO BE JUDGED BY THE REGISTER WITHIN THEMSELVES.

REMARKS BY ELDER JOHN TAYLOR, MADE IN THE TABERNACLE, GREAT SALT LAKE CITY, SUNDAY, FEB. 5, 1865.

REPORTED BY G. D. WATT.

I have felt much impressed with the beautiful hymn which our choir has just sung, speaking of our Heavenly Father and our return again into his presence. We frequently talk about our Father who is in heaven, and we delight to dwell upon our relationship with him, and anticipate with pleasure the time when we shall behold his face, regain his presence, and rejoice with him, with the Savior, and with the spirits of the just made perfect, in the eternal world. The Lord has revealed a great many good and great things unto us, but yet we seem scarcely to appreciate the privileges with which we are surrounded and blessed. nor to comprehend exactly our true relationship to our Heavenly Father.

I was very much pleased with some remarks made by President Young in relation to our Father two or three weeks ago, wherein he describes him as being like ourselves, and possessing the power to associate with us, and, that if we were to gaze upon him we should see a person like ourselves; yet he is spoken of as being able to read the thoughts of our hearts, and that a sparrow cannot fall to the ground without his notice. There are some peculiar expressions in the Scripture and in the revelations that we have had given to us, which we may term Scripture, if you please, pertaining to our Father who is in heaven. We are told in one place

that "He is the light that enlighteneth every man that cometh into the world." We are told, also, "That every good and perfect gift proceeds from the Father of lights, in whom there is no variableness, nor shadow of turning." We are told in some of our revelations, which the Lord has given to us in these last days, that "He is the light that is in the sun, and the power thereof by which it was made; that he is the light that is in the moon, and the power by which it was made; that he is the light that is in the stars and the power whereby they were made; and that is the same light that enlighteneth the understanding of man." According to some of our systems of philosophy, and the ideas that theologists would entertain in relation to this matter, these remarks would appear strange and incongruous.

We have been led generally to suppose that the light which enlighteneth the understanding of man is what is termed of an intellectual character, and differs materially from the solar light, or the light of the sun; but if we examine these things critically, we shall find that there is mixed up with the philosophy of the heavens and the earth things that have been altogether out of the reach of human philosophy; that all true intelligence, all true wisdom, all intelligence that is of any use or benefit to the human family, proceeds from
